

It takes three barrels of oil to provide the same heat energy using electricity as one barrel of oil using gas for similar tasks.

**Gas makes the most sense.**

Electricity

vs.

Gas

Cooking and heating and drying with gas makes the most sense. Gas is cleaner — less than 40% of the carbon output of electricity for the same tasks. Gas is cheaper — less than the cost of electricity for the same tasks. Gas is reliable — when the lights go out, the gas stays on. Next to the sun itself, gas is the best source of heat energy in and for Hawaii.
